

FUNCTIONAL REQUIREMENT DOCUMENT

FR ID	Module	Functional Requirement	Priority
FR-001	User Registration	The system shall allow new patients to register by entering personal and contact details.	High
FR-002	Patient Login	The system shall allow registered patients to log in securely using their credentials.	High
FR-003	Appointment Booking	The system shall allow patients to book appointments based on doctor availability.	High
FR-004	Appointment Management	The system shall allow patients to reschedule or cancel appointments before the scheduled time.	High
FR-005	Doctor Schedule Management	The system shall allow administrators to create and update doctor schedules.	High
FR-006	Patient Records	The system shall maintain a centralized electronic medical record (EMR) for each patient.	High
		The system shall	

FR-007	Appointment Notifications	send appointment confirmation and reminder notifications via SMS or email.	Medium
FR-008	Reception Dashboard	The system shall allow receptionists to search, register, and manage patient appointments.	High
FR-009	Doctor Dashboard	The system shall allow doctors to view daily appointments and patient medical history.	High
FR-010	Admin Dashboard	The system shall provide administrators with user management and system monitoring capabilities.	High
FR-011	Reporting & Analytics	The system shall generate reports on appointments, patients, doctors, and hospital performance.	Medium
FR-012	Search Functionality	The system shall allow users to search patients using Patient ID, Name, or Mobile Number.	Medium
		The system shall provide role-based	

FR-013	Role-Based Access	access for Patients, Receptionists, Doctors, Administrators, and Management	High
FR-014	Billing Integration	The system shall record billing details and link them to the respective patient records.	Medium
FR-015	Audit Log	The system shall maintain an audit log of important user activities such as login, appointment updates, and record modifications.	Low

Non-Functional Requirements (NFR)

NFR ID	Category	Non-Functional Requirement	Priority
NFR-001	Performance	The system shall load dashboard and application pages within 3 seconds under normal operating conditions.	High
NFR-002	Availability	The system shall maintain 99.5% uptime during hospital working hours.	High
NFR-003	Security	The system shall require secure login with role-based access for all users.	High
NFR-004	Data Privacy	Patient information shall be encrypted during storage and transmission to protect sensitive medical data.	High
NFR-005	Reliability	The system shall automatically back up hospital data once every 24 hours .	High
NFR-006	Scalability	The system shall support future expansion to additional hospital branches without major system changes.	Medium

NFR-007	Usability	The user interface shall be simple and easy to use with minimal training for hospital staff.	High
NFR-008	Compatibility	The application shall support the latest versions of Chrome, Edge, Firefox, and Safari browsers.	Medium
NFR-009	Maintainability	The system shall be designed to allow future enhancements and bug fixes with minimal disruption.	Medium
NFR-010	Auditability	The system shall record user activities such as login, appointment updates, and patient record modifications for audit purposes.	Medium
NFR-011	Recovery	In case of system failure, the application shall restore the latest backup within 4 hours .	Medium
NFR-012	Accessibility	The application shall provide a responsive interface that works on desktops, tablets, and mobile devices.	Medium
